

## Introduction

Blue Altitude is proud to announce that we have achieved ISO 14001:2015 certification, reinforcing our commitment to environmental responsibility and sustainable business practices across the aviation sector. This milestone reflects our proactive approach to managing environmental impact while continuing to deliver high-quality safety, compliance, and training services to our clients. We can help YOU achieve this.

## What ISO 14001 Means

Building on our existing ISO 9001 certification, ISO 14001 is the internationally recognised standard for Environmental Management Systems (EMS). It provides a structured framework to identify, manage, monitor, and continually improve environmental performance.

Achieving certification demonstrates that Blue Altitude:

- Operates with a defined and controlled environmental management system
- Identifies and mitigates environmental risks across its activities
- Complies with applicable environmental legislation and obligations
- Is committed to continual improvement and sustainable practices

## Why This Matters to Our Clients

For our clients, this certification provides confidence that Blue Altitude:

- Integrates environmental considerations into safety and compliance solutions
- Supports organisations striving to meet their own sustainability objectives
- Aligns with modern aviation expectations, including Environmental, Social and Governance (ESG) expectations and evolving regulatory developments
- Delivers services with a responsible and forward-thinking approach

As aviation continues to evolve, environmental performance is becoming increasingly critical alongside safety and compliance. Blue Altitude is positioned to support this transition.

## How Blue Altitude Can Support You

We support organisations in:

- Implementing ISO 14001 Environmental Management Systems
- Integrating ISO 14001 into existing Safety & Compliance frameworks
- Preparing for certification and external audits
- Developing practical, proportionate environmental controls aligned to aviation operations

### **Supporting the Aviation Industry**

Our ISO 14001 certification strengthens our ability to support:

- Part 145, CAMO, and operational organisations
- UAV / Drone operators and emerging technologies
- Organisations seeking integrated Safety, Compliance, and Environmental Management Systems

We understand that environmental management cannot sit in isolation. It must be integrated into existing governance, risk, and compliance frameworks, something Blue Altitude specialises in.

### **Our Commitment**

This certification is not the end point, it is part of our continuous journey.

We remain committed to:

- Reducing environmental impact across our operations
- Supporting clients in achieving their own environmental objectives
- Delivering practical, proportionate, and effective management system solutions

Ready to integrate environmental performance into your safety and compliance framework? Blue Altitude provides practical, aviation-focused solutions to help your organisation achieve, integrate, and maintain ISO 14001 certification.
